Unit#3

Topic:Our World & Pollution

S.date:07 / 05 / 2021

E.date:07 / 05 / 2021

Day:Friday

Comprehension

Activities

I. Answer the following questions.

- i) Define "Pollution".
- ii) How is the atmosphere being polluted?
- iii) What is affecting ozone layer?
- iv) What are the reasons of water pollution?
- v) What do you know about noise pollution?
- vi) What can we do to control atmospheric pollution?

Answer the following questions.

i) Define "Pollution".

Ans. Making something dirty or destroy its purity is called pollution. Generally pollution means the presence of harmful materials, chemical and gases etc, in our atmosphere.

ii) How is the atmosphere being polluted?

Ans. The atmosphere is being polluted due to burning of oil, gases and chemicals in large quantity.

iii) What is affecting ozone layer?

Ans. Carbon di-oxide is affecting ozone layer.

iv) What are the reasons of water pollution?

Ans. Throwing of garbage and industrial wastes in to streams, canals, rivers and seas are the main reasons of water pollution.

v) What do you know about noise pollution?

Ans. The piercing sounds of different kinds of machinery, flying aero plane, pressure horns, moving vehicles and traffic cause noise pollution which damages our hearing ability.

vi) What can we do to control atmospheric pollution?

Ans. We will have to take serious steps to control atmospheric pollution such as we must not let carbon dioxide and other gases to be emitted in huge and disturbing quantities. Moreover we

should not let the vehicles giving out much smoke to come on the roads. We should not cut the trees at all but should increase their number. We should also not throw the garbage and industrial waste in the streams, canals, rivers and seas etc.
